

1. Implement Search for Recipes

In my app, I want users to be able to:

- search for recipes according to their name
- search for recipes according to an ingredient

Data Analysis

Bar chart

This bar chart will show the recipe/s and how long they take to make.

X - recipe name

Y - cooking time

Pie chart

This pie chart will display the cooking time of a recipe/s

Line Chart

This line chart will show the recipe/s and their cooking time/s

X - recipe name

Y - cooking time

Execution Flow
